

Autonomous Document Toolchain

*Transforming Markdown into LaTeX-Quality PDFs &
Slides*

Design Philosophy

- **Slides:** Divided cleanly by --- , first section configures style and theme.
- **Documents:** LaTeX-grade typesetting with Computer Modern fonts and mathematical precision.
- **Zero Friction:** No manual table of contents needed.
- **Configurable Defaults:** Set author, fonts, and styles globally or per project.

Slide Architecture

- Use standard Markdown formatting for content
- Slides are separated by standard --- horizontal rules
- Interactive HTML output includes presenter notes (P) and overview grid (O)
- Native PDF slide export powered by headless Chrome

Code Snippet

```
# Compile documentation
botox paper.md -o paper.pdf

# Compile slide presentation
botox presentation.md -o presentation.pdf
```

Summary

- Fast compilation in milliseconds
- Real LaTeX typography using Typst under the hood
- Built for engineers and researchers
